Subheader Two

Lorem ipsum dolor sit amet, in Gold.

Lorem ipsum dolor sit amet, in LavaGreen.

Lorem ipsum dolor sit amet, in MediumBlue.

Subheader Three

Scott's favorite movies:

- *Planet of the Apes* (1968)
- *Last of the Mohicans*
- *Tomb of Linn*
- *Menemba*
- *Rio Bravo*

Scott's most-used Web sites:

3

Code

4

5

You don't know HTML or CSS yet
You have to use old, deprecated HTML 4.01

6

How are you going
to set colors?

7

How are you going
to indent the first paragraph?

8

How are you going
to center & right-align the paragraphs?

9

How are you going
to make the footer text small?

10

Coding

11

For coding,
I recommend Brackets

brackets.io

12

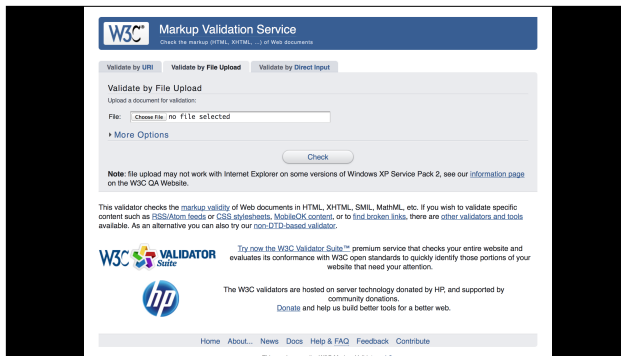

When you code,
as soon as you open a tag,
close it

13

Test your code often
by saving
& loading it in your web browser

14

Validate your code often
validator.w3.org

The screenshot shows the W3C Markup Validation Service interface. At the top, there is a blue header with the W3C logo and the text "Markup Validation Service" and "Check the markup of HTML, XHTML, SMIL, MathML, etc. of Web documents". Below the header, there are three tabs: "Validate by URI", "Validate by File Upload", and "Validate by Direct Input". The "Validate by File Upload" tab is selected. Under this tab, there is a section titled "Validate by File Upload" with the instruction "Upload a document for validation:". Below this, there is a "File:" label followed by a text input field containing "Choose file, no file selected". To the right of the input field is a "Choose file" button. Below the input field is a "More Options" link. At the bottom of the form is a "Check" button. Below the form, there is a note: "Note: file upload may not work with Internet Explorer on some versions of Windows XP Service Pack 2, see our information page on the W3C QA Website." Below the note, there is a paragraph of text: "This validator checks the markup validity of Web documents in HTML, XHTML, SMIL, MathML, etc. If you wish to validate specific content such as RSS/Atom feeds or CSS stylesheets, MobileCR content, or to find broken links, there are other validators and tools available. As an alternative you can also try our open-HTML-based validator." Below this text, there are two logos: the W3C Validator Suite logo and the HP logo. To the right of the HP logo, there is text: "Try now the W3C Validator Suite™ premium service that checks your entire website and evaluates its conformance with W3C open standards to quickly identify those portions of your website that need your attention." Below this text, there is another paragraph: "The W3C validators are hosted on server technology donated by HP, and supported by community donations. Donate and help us build better tools for a better web." At the bottom of the page, there is a navigation menu with links: "Home", "About...", "News", "Docs", "Help & FAQ", "Feedback", and "Contribute".

Validate every few saves

Errors can cascade:
the validator says you have 100 errors,
but if you fix the first,
all the others disappear

Thank you!
